**Re: CC Docket No. 94-102
Cellular Radiotelephone Service Station KNKN691,
CMA Market No. 666(B2), Texas 15(B2) - Concho RSA.**

E-911 Interim Report

Dear Ms. Dortch:

This report is being submitted pursuant to the requirements of the Commission's Order to Stay (CC Docket No. 94-102), FCC 02-210, released July 26, 2002 ("Stay Order") and the recently issued Public Notice, entitled "Wireless Telecommunications Bureau Provides Further Guidance on Interim Report Filings by Small Sized Carriers," Mimeo DA 03-2113, released June 30, 2003.

The Filer, Texas RSA 15B2 Limited Partnership d/b/a Five Star Wireless, is a Tier III non-nationwide Commercial Mobile Radio Service carrier. The Filer was not granted relief in the Stay Order, but has pending before the Commission a request for similar relief. The information is presented in the format specified by the Commission, as follows:

A) The Number Of Phase I And Phase II Requests From PSAPs (including those the carrier may consider invalid): The Public Safety Answering Points ("PSAPs") in the Filer's service area are identified as follows: 1) Kerr County, Texas – Kerrville Police Department (which forwards 911 calls to the Kerr County Sheriff's Department for emergencies located outside the City of Kerrville); 2) Kimble County, Texas – Kimble County Sheriff's Department; 3) Gillespie County, Texas – Gillespie County Sheriff's Department; and 4) Kendall County, Texas – Kendall County Sheriff's Department.

The Filer is E-911 Phase I compliant throughout its service area, and delivers Phase I Automatic Location Information ("ALI") data elements to the PSAPs in Kimble,

Gillespie and Kendall Counties. Phase I ALI data elements are not delivered to the Kerr County PSAP because, to date, it does not have the ability to process the information.

The Filer has not received any requests for Phase II E-911 service.

B) The Carrier's Specific Technology Choice (i.e., network-based or handset-based solution, as well as the type of technology used): The Filer's cellular system currently provides both analog and Time Division Multiple Access ("TDMA") digital transmission capacity; and employs base station and switching equipment manufactured by Lucent Technologies. The Filer may deploy either Code Division Multiple Access ("CDMA") or Global System for Mobile Communication (GSM) transmission capacity in the future.

The Filer currently intends to employ a network-based E-911 Phase II solution in the form of both Time Difference of Arrival ("TDOA") and Angle of Arrival ("AOA") technologies. However, the Filer may switch to a handset-based solution should it become necessary or appropriate to do so.

C) Status Of Ordering And/Or Installing Necessary Network Equipment: To date, the Filer has not ordered any E-911 Phase II network equipment.

D) If The Carrier Is Pursuing A Handset-Based Solution, Include Information On Whether ALI-Capable Handsets Are Now Available, And Whether the Carrier has Obtained ALI-Capable Handsets Or Has Agreements In Place To Obtain These Handsets: This area of inquiry is not applicable because the Filer is not currently pursuing a handset-based Phase II E-911 ALI solution.

E) The Estimated Date On Which Phase II Service Will First Be Available In The Carrier's Network: Since the Filer has not received a PSAP request for Phase II E-911 service, the Filer is unable to estimate the date on which Phase II service will first be available in the Filer's service area.

F) Information On Whether The Carrier Is On Schedule To Meet The Ultimate Implementation Date Of December 31, 2005: This area of inquiry is not applicable because the Filer is not currently pursuing a handset-based Phase II E-911 ALI solution.

Very truly yours,

**Texas RSA 15B2 Limited
Partnership d/b/a Five Star
Wireless**
